the book addresses a long felt need to describe and investigate the education and training of school administrators the topic is especially timely with the current emphasis on educational reform and reports from the effective schools research which puts emphasis on the quality of leadership especially principals patricia a schmuck lewis and clark college in this important new collection murphy and hallinger bring together descriptions of a wide range of the new models in use in educational administrative training most of these eleven models have developed in response to contemporary criticism of the educational administrative theory movement and each in its own way strives to bridge the chasm between educational theory and practice the approaches represented here stress the importance of the administrators engagement in the daily life of the school and encourage administrators to learn from one another while some models have come from leadership academies others have been developed and tested in state departments of education professional associations and educational institutions the book represents an important resource for those working with pre and inservice administrators as they learn ways in which their involvement can improve the nation s schools

dealing with issues and concerns of administrative theory this anthology analyses the various approaches and models in the context of their relevance and impact

this book presents a detailed introduction to the fundamental concepts principles and processes of the field of public administration it provides comprehensive coverage of the major topics of this diverse field intended primarily for undergraduate and postgraduate students of public administration and political science as well as for civil services aspirants this book will also be a handy reference for professionals in public service and social service the book presents an overview of the field of public administration as well as its fundamental aspects which include the theory of administration and the nature typology and structure of organisations it explains the major theoretical perspectives as well as two major specialised areas of the field public policy and development administration it also provides an extensive presentation of the prominent aspects of the public administration and management process span of control coordination communication authority and responsibility centralisation and decentralisation and accountability and control

the text is designed to help prospective and experienced principals administrators and supervisors increase their

knowledge and skills through concepts case studies and simulations two parts makeup this text part i presents important theoretical concepts and research findings that if adequately understood and appropriately applied can improve educators problem solving and leadership effectiveness problems and issues illustrated in case studies and simulations are presented in part ii nevertheless it is the problem dimension of human behaviour in school administration that should be studied and it is here that preparation and in service training programs need to be directed if prospective and experienced administrators and supervisors are to be equipped with the skills needed for the future as well as for the present

public administration is commonly assumed to be a young discipline rooted in law and political science with little history of its own likewise teaching and scholarship in this field is often career oriented and geared either toward the search for immediately usable knowledge or guidelines and prescriptions for the future although most administrative scientists would acknowledge that their field has a history their time horizon is limited to the recent past raadschelders demonstrates that public administration has in fact a long standing tradition both in practice and in writing administration has been an issue ever since human beings recognized the need to organize themselves in order to organize the environment in which they lived this history in turn underlines the need for administrators to be aware of the importance and contemporary impact of past decisions and old traditions in seeking to go beyond the usual problem solving and future oriented studies of public administration this volume adds greatly to the cognitive richness of this field of research indeed the search for theoretical generalizations will profit from an approach that unravels long term trends in the development of administration and government raadschelders approaches public administration history from a dual perspective as trained historian and professor of public administration the volume is appropriately called a *Ã* handbook in view of its methodical listing of the literature on administrative history together with summaries of numerous authors principal theories the second chapter is an essay on sources in the field including an extended bibliography these parts of the book alone make it useful to scholars in the field raadschelders is helpful in other ways as well the third and fourth chapters offer a highly sophisticated discussion of methodological problems encountered in writing administrative history including the issue of perceiving *Ã* stages other chapters discuss leading substantive issues such as the development of bureaucracy and citizenship the author combines his own history telling with more bibliographic commentary raadschelders presents his own overarching theory on the development of government built around the thesis that centuries of state making dedicated protecting territory were eventually balanced by a period of

nation building that served the people this attempt at grand synthesis is admirable but less valuable than his remarkable success in reviewing the field's enormous range of complexity and variety of viewpoints this is the most important work to appear on the subject since E.N. Gladden's two volume history of public administration 1972. C.T. Goodsell's choice, J.S. C.N. Raadschelders, is associate professor of public administration at the University of Leiden. He is the author and co-author of several books in Dutch on various aspects of public administration.

This is a timeless work which will be valuable to students pursuing any aspect of management or administration in any setting or environment while challenging the student and/or manager to develop new thoughts and ideas about the management of formal organizations. Hermi H. Hewitt, OD, PhD, RN, RM, FAAN.

The best book on the importance of presidential transitions to the long term successes of administrations. Contemporary scholars and practitioners will be especially interested in Pfiffner's treatment of the problems that surrounded the Clinton administration's troubled start. Mark J. Rozell, author of *Executive Privilege*.
